Week 03 Assignment 01: Discovery Tools (Catalogs)

- Using the USC Library Catalog, conduct a search on library management.
 - How many search results did you return?

18,065 Results

- Using the refine options on the left side, limit your search to:
 - Items Available in the Library
 - How many search results did you return this time?

5,853 Results

- Now, refine your search to items published between 2010–2020.
 - How many search results did you return this time?

669 Results

- What are some other limits you can apply?
 - List two and apply them to your search.

If it is Available Online.

What type of material it is, such as a Book or Journal

- Pick a physical book (not an e-book) located in the Library stacks, and click on the title.

- Create an APA citation for the book.

Hussey, L., & Velasquez, D. (2019). *Library management 101: A practical guide* (Second edition). ALA Editions.

- List at least one subject heading for the book.

Library administration

- Now select an e-book and click on the title.

- Create an APA citation for the e-book.

Maron, N., Yun, J., & Pickle, S. (2014). *Sustaining digital resources institutional strategies for digital content*. Ithaka S+R.

- List at least one subject heading for the e-book.

Digital libraries -- Great Britain -- Management

- Overall, what catalog features did you notice that will be helpful with your research?

I believe the features that will be the most helpful are the ability to sort by self-determined dates rather than predetermined ones, being able to look specifically for online resources, and being able to search specifically for books, journals, or other media as I wish. I like it when I don't have to go searching for online resources and it will make things much easier to find specific and up to date online sources, especially since physical sources will be a bit harder to get ahold of living across the country.
